

The visible persuaders - 12 new reasons for choosing a Commando

1 New dual coil 12 volt ignition system with ballast resistor. Constant powerful spark regardless of battery condition. Electrolytic capacitor fitted to improve starting with flat battery.

2 New rubber mounted 6 pint oil tank for cooler oil.

3 New cush shock absorption drive in rear hub. Insulates road shocks from the transmission and engine minimising chain wear and adjustment. New single nut fixing for quick wheel change.

4 New front fork geometry giving an all round improvement in steering, especially at high speeds. Special sealed head bearings requiring no adjustment. New no-ride steering lock.

5 410 x 19 front tire for greater comfort and safety.

6 New roll-on center stand and prop stand for easy-lift parking. Both tuck up high for maximum clearance during fast cornering.

7 New electrical system of advanced conception including headlite dipper, ignition and main beam warning lites, independent front and rear brake lite switches, four position ignition (key) switch, external power point takeoff, and alternator. Redesigned battery tray with quick action security strap.

8 Improved control levers and handlebar layout with soft cushion hand grips.

9 New easy-read instrument dials of superior appearance.

11 Restyled luxury deep-padded contoured seat.

12 New and stronger chainguard of modern functional design.

10 Redesigned muffler. Complies with noise regulations without losing that distinctive Commando sound. Actual power increases are attained in the middle rev range where you need it most.

*The only thing we never
feel like changing is the girl!*
